

Easy course

Brinkworth Reserve

- Take a pencil
- You have to go to each control in order, starting from the triangle
- When you get to a control, check that the “control number” is correct (ie. you are at the right control)
- Record the letters in the “control code” box
- Go to all the controls and then return to the finish and record your time

The organiser will check that you have visited the correct controls by checking the letters

To orienteer well you need to ;

- Turn you map so the north arrows are pointing to where north is. Keep it this way
- Work out where you are on the map. The start is shown by a triangle
- Look at the legend to see what symbols on the map mean. Look around you to see how things nearby are shown on the map
- Work out how you will go to the first control (going straight is often not the best choice. Pick a feature near to the control and head for it). Adults may wish to discuss the route choice, and features on that route, with children before they set out
- Set off, identifying things (features) on the map as you pass them
- **Always** know where you are on the map by relating symbols on the map to things you see
- Only run when you are confident you know where you are going

Control card

Record your answer here

	Control number	Feature	Control code
1	10	Tree stump	
2	11	Fence corner	
3	12	Gate	
4	13	Boulder	
5	21	Stones	
6	15	Track junction	
7	16	Termite mound	
8	23	Boulder	
9	18	Tree	

An “example” control

	<p>This control has a “control number” 25</p> <p>You would need to record the “control code” GN</p>
